www.scale-train.com

Introduction

Hi, my name is Alain Pelletier.

I am a registered Professional Engineer in the Province of New Brunswick Canada. My specialty is Computer Engineering with an electronic technology background.

Being a programmer by formation, I was looking for products to put in my online store. I now have a growing array of various products I sell online. Within a year over 100 000 visitors came over to my web sites to ask questions, purchase and get informed.

Something drew my attention: **Model trains.**

I was introduced to model trains by Serge Lebel from SMD Products, maker of N-Scale signals. I found out that Model Trains are special. Model. Modelists have a thirst for nice things. The passion for their hobby requires an unexplainable commitment.

The satisfaction of creating something nice for **YOURSELF** can't be measured.

Thank you for your interest in our products.

Best regards,

Alain Pelletier P. Eng.

Founder of www.scale-train.com

Laser cut kits

Quality workmanship

Laser cut N-Scale structure for model railroad: CO-OP Edmunston Building SMD-N-201

The Limited Edition CO-OP is inspired from an existing structure located in New Brunswick, Canada. It will look great regardless of the modeling era. It is 70 years old.

The scale is 40 feet x 100 feet. It is laser cut using birch plywood for great results and detail.

This kit comprises castings, window glazing and metal roofing material. Parts such as windows, doors and trims are included. Smaller parts sport an adhesive backing to ease installation.

<ul style="list-style-type: none"> • Birch plywood • Window glazing • Metal roofing • 40 feet x 100 feet structure • Nice finished look • Designed by experienced modelist • Limited edition: Only 250 made 	Specifications	
	CO-OP	N 1:160
	Scale width	40 feet
	Scale length	100 feet
	Windows included?	Yes
	Doors included?	Yes
	Trims included?	Yes
	Inspired from Real Building?	Yes
	Manufacturer	Scale Model Division (SMD Products)
	Full part number	SMD-N-201
	Production amount	Limited to 250
	Original building profile?	History of building available
	Kit details	Details available
	Assembly notes?	Notes available
Price	\$79.99 USD	

Laser cut N-Scale structure for model railroad: Lighthouse SMD-N-204

Lighthouses were used along shore line as a navigational aid. The use of the lighthouse has been greatly reduced because of modern technology. Still, they remain part of our heritage and continue to be a landmark

This is the our most popular Laser cut kit and comprises detailed lighthouse, Light and electronic circuitry.

<ul style="list-style-type: none"> • Working light and circuitry • Made in Canada • Limited run • Designed by experienced modelist 	Specifications	
	Model Railroad Scale	N 1:160
	Windows included?	Yes
	Production quantity?	Limited to 100
	Light and electronics included?	Yes
	Inspired from real lighthouse?	Yes
	Manufacturer	Scale Model Division (SMD Products)
	Full part number	SMD-N-204
Price	\$74.99 USD	

Laser cut N-Scale structure for model railroad: Low profile truck scale SMD-N-202

If you have trucks on your layout, you will need to have a truck scale.

This kit comprises detailed scale house, signs and an operating signal light choice of windows for modern or older style.

<ul style="list-style-type: none"> • Working signal • Nice finished look • Designed by experienced modelist 	Specifications	
	Model Railroad Scale	N 1:160
	Scale width	40 feet
	Scale length	100 feet
	Windows included?	Yes
	Scale house included?	Yes
	Signal included?	Yes
	Inspired from real truck scale?	Gabriel truck scale - low profile line
	Manufacturer	Scale Model Division (SMD Products)
	Full part number	SMD-N-202
Price	\$34.99 USD	

Laser cut N-Scale structure for model railroad: Fog horn house Building SMD-N-207

The Limited Edition Fog horn house is inspired from an existing structure located in Nova Scotia, Canada.

It will look great regardless of the modeling era. It is laser cut using birch plywood for great results and detail.

This kit comprises castings, window glazing and metal roofing material. Parts such as windows, doors and trims are included. Smaller parts sport an adhesive backing to ease installation.

<ul style="list-style-type: none"> • Birch plywood • Nice detailed look • Designed by experienced modelist • Limited edition: Only 250 made 	Specifications	
	Fog Horn House & generator shed	N 1:160
	Windows included?	Yes
	Doors included?	Yes
	Trims included?	Yes
	Inspired from Real Building?	Yes
	Manufacturer	Scale Model Division (SMD Products)
	Full part number	SMD-N-207
	Production amount	Limited to 250
Price	\$41.75 USD	

Laser cut N-Scale kit Rest area 1 SMD-N-402

This rest area kit would look great in your model train world.

It will look great regardless of the modeling era.

It is laser cut using birch plywood for great results and detail.

<ul style="list-style-type: none"> • Birch plywood • Nice detailed look • Designed by experienced modelist • unlimited edition 	Specifications	
	Rest Area Picnic Tables - kit	N 1:160
	Inspired from Real rest area?	No, Fictitious area
	Package content	2 Picnic tables and one covered shelter for picnic table
	Assembled?	No, this is a kit
	Manufacturer	Scale Model Division (SMD Products)
	Full part number	SMD-N-402
	Production amount	Not limited
Price	\$19.99 USD	

Laser cut N-Scale kit Rest area #2 SMD-N-403

This rest area kit would look great in your model train world.

It will look great regardless of the modeling era. It is laser cut using birch plywood for great results and detail.

<ul style="list-style-type: none"> • Birch plywood • Nice detailed look • Designed by experienced modelist • unlimited edition 	Specifications	
	Rest Area Picnic Tables - kit	N 1:160
	Inspired from Real rest area?	No, Fictitious area
	Package content	2 Picnic tables and one rest area building
	Assembled?	No, this is a kit
	Manufacturer	Scale Model Division (SMD Products)
	Full part number	SMD-N-403
	Production amount	Not limited
Price	\$19.99 USD	

Laser cut N-Scale kit Truck Ramp SMD-N-501

New quick kits in HO scale. This is a nice loading / unloading ramp that is used in rail yards and team tracks. This kit is easy to assemble and comprises exquisite laser details like nail heads and board by board look for the deck and ramp.

<ul style="list-style-type: none"> • Birch plywood • Nice detailed look • Designed by experienced modelist • unlimited edition 	Specifications	
	Truck Ramp	N
	Skill Level	Intermediate
	Manufacturer	Scale Model Division (SMD Products)
	Full part number	SMD-N-501
	Production amount	Not limited
Price	\$19.99 USD	

Laser cut HO-Scale kit Rest area SMD-HO-402

This rest area kit would look great in your model train world. It includes one covered shelter and two picnic tables. It will look great regardless of the modeling era. It is laser cut using birch plywood for great results and detail.

<ul style="list-style-type: none"> • Birch plywood • Nice detailed look • Designed by experienced modelist • unlimited edition 	Specifications	
	Rest Area Picnic Tables - kit	HO
	Inspired from Real rest area?	No, Fictitious area
	Package content	2 Picnic tables and one covered shelter for picnic table No other accessories included
	Assembled?	No, this is a kit
	Manufacturer	Scale Model Division (SMD Products)
	Full part number	SMD-HO-402
	Production amount	Not limited
Price	\$19.99 USD	

Laser cut N-Scale Kit: Greenhouse SMD-N-205

Greenhouses are used in farms and residences. This is part of our line of QuickKits.

Specifications

Model Railroad Scale	N 1:160
Windows included?	Yes
Production quantity?	Unlimited
Inspired from real greenhouse?	Yes
Manufacturer	Scale Model Division (SMD Products)
Full part number	SMD-N-205
Price	\$20.30 USD

Signals and Detection

Make operation fun

Two light single target mast signal SMD-N-100

The n Two light single target mast signal SMD-N-100 will look great on your N 1:160 setup

Signals provide realistic Green over Red signaling for the pre 1970s to present era available in Black or Silver with Black target

Signals built using etched brass to provide the quality of workmanship you demand as a moderate or advanced model railroader

Alain Pelletier is an authorised dealer of this product, not manufacturer

(C) 2005 All text and images are property of Alain Pelletier

Specifications		
<ul style="list-style-type: none"> • Precision crafted n • Circuit board with resistors included • Easy to follow instructions • Quality etched brass • A must for SERIOUS modeling • Signals Available in 2 colors • Signals hand made by an advanced modelist • Signals made in Canada by picky advanced modelist 	Modeling decade	pre 1970s to present
	Colors available	Black or Silver with Black target
	Signal color	Green over Red
	Model railroad scale	N 1:160
	Signal type	Mast mounted oval single target with 2 lights
	Manufacturer	Scale Model Division (SMD Products)
	Modeling expertise required	Low - Moderate
	Full part number	SMD-N-100
	International shipping?	Canada / US domestic postal shipping Airmail from Canada for international shipping
	Price	\$24.99 USD

Three light single target mast signal SMD-N-101

The n Three light single target mast signal SMD-N-101 will look great on your N 1:160 setup

Signals provide realistic Green over Yellow over Red signaling for the pre 1970s to present era available in Black or Silver with Black target

Signals built using etched brass to provide the quality of workmanship you demand as a moderate or advanced model railroader

<ul style="list-style-type: none"> • Precision crafted n • Circuit board with resistors included • Easy to follow instructions • Quality etched brass • A must for SERIOUS modeling • Available in 2 colors • Signals hand made by an advanced modelist • Signals made in Canada by picky advanced modelist 	Specifications	
	Modeling decade	pre 1970s to present
	Colors available	Black or Silver with Black target
	Signal color	Green over Yellow over Red
	Model railroad scale	N 1:160
	Signal type	Mast mounted oval single target with 3 lights
	Manufacturer	Scale Model Division (SMD Products)
	Modeling expertise required	Low - Moderate
	Full part number	SMD-N-101
	International shipping?	Canada / US domestic postal shipping Airmail from Canada for international shipping
Price	\$26.99 USD	

Two light single target dwarf signal SMD-N-103

The two light single target dwarf signal SMD-N-103 will look great on your N 1:160 setup

This signal is dwarf or ground type. This is mostly used in slow traffic area such as yards and interlocking exits.

Signals provide realistic Green over Red signaling for the present era available in Silver with Black target

Signals built using etched brass to provide the quality of workmanship you demand as a moderate or advanced model railroader

Specifications		
<ul style="list-style-type: none"> • Precision crafted • Circuit board with resistors included • Easy to follow instructions • Quality etched brass • A must for SERIOUS modeling • Signals hand made by an advanced modelist • Signals made in Canada by picky advanced modelist 	Modeling decade	present
	Colors available	Silver with Black target
	Signal color	Green over Red
	Model railroad scale	N 1:160
	Signal type	Ground level oval single target with 2 lights
	Manufacturer	Scale Model Division (SMD Products)
	Modeling expertise required	Low - Moderate
	Full part number	SMD-N-103
	International shipping?	Canada / US domestic postal shipping Airmail from Canada for international shipping
	Price	\$17.99 USD

Three light single target dwarf signal SMD-N-104

The n three light single target dwarf signal SMD-N-104 will look great on your N 1:160 setup

This signal is dwarf or ground type. This is mostly used in slow traffic area such as yards and interlocking exits.

Signals provide realistic Red, green and ambre signaling for the present era available in Silver with Black target

Signals built using etched brass to provide the quality of workmanship you demand as a moderate or advanced model railroader

<ul style="list-style-type: none"> • Precision crafted n • Circuit board with resistors included • Easy to follow instructions • Quality etched brass • Signals are nice and bright! • A must for SERIOUS modeling • Signals hand made by an advanced modelist 	Specifications	
	Modeling era	present
	Colors available	Silver with Black target
	Signal color	Red, green and ambre
	Model railroad scale	N 1:160
	Signal type	Mast mounted round single offset target - 3 color lamp
	Manufacturer	Scale Model Division (SMD Products)
	Modeling experise reqired	Low - Moderate
	Full part number	SMD-N-104
	International shipping?	Canada / US domestic postal shipping Airmail from Canada for international shipping
Price	\$19.99 USD	

Offset target interlocking advance signal SMD-N-105

The n Offset target interlocking advance signal SMD-N-105 will look great on your N 1:160 setup

Signals provide realistic Red - Yellow - Green for each target signals signaling for the present era available in Silver with Black target

Signals are built using etched brass to provide the quality of workmanship you demand as a moderate or advanced model railroader

Specifications		
<ul style="list-style-type: none"> • Precision crafted n • Circuit board with resistors included • Easy to follow instructions • Quality etched brass • A must for SERIOUS modeling • Signals hand made by an advanced modelist 	Modeling decade	present
	Colors available	Silver with Black target
	Signal color	Red - Yellow - Green for each target signals
	Model railroad scale	N 1:160
	Signal type	Mast mounted round double staggered offset target
	Manufacturer	Scale Model Division (SMD Products)
	Modeling expertise required	Low - Moderate
	Full part number	SMD-N-105
	International shipping?	Canada / US domestic postal shipping Airmail from Canada for international shipping
	Price	\$31.99 USD

Aligned target interlocking advance signal SMD-N-108

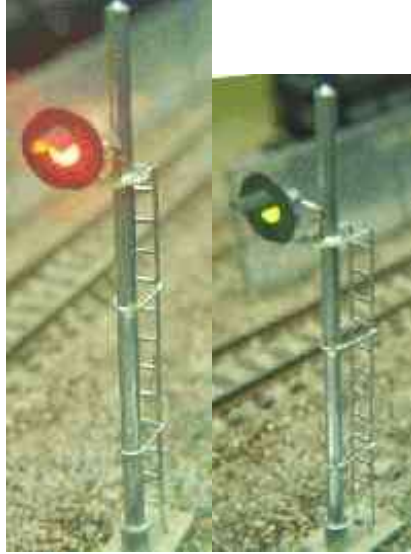

The n: Aligned target interlocking advance signal SMD-N-108 will look great on your N 1:160 setup

Signals provide realistic Red - Yellow - Green for each target signaling for the present era available in Silver with Black target

Signals are built using etched brass to provide the quality of workmanship you demand as a moderate or advanced model railroader

This signal is similar to [SMD-N-108](#) but has no platform for servicing.

<ul style="list-style-type: none"> • Precision crafted n: • Circuit board with resistors included • Easy to follow instructions • Quality etched brass • A must for SERIOUS modeling • Hand made by an advanced modelist • Quality made in Canada 	Specifications	
	Modeling decade	present
	Colors available	Silver with Black target
	Signal color	Red - Yellow - Green for each target

Price	\$53.99 USD	

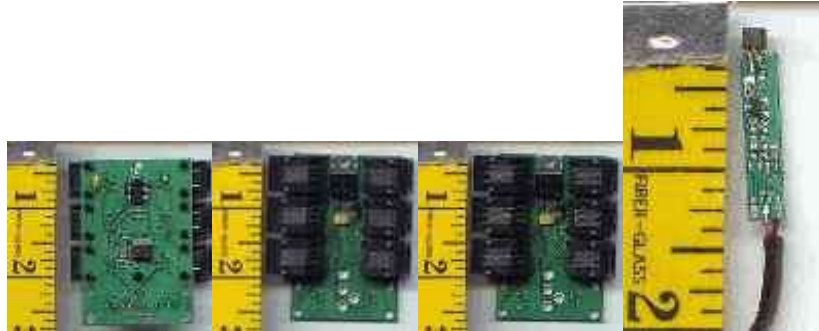

Etched brass N-Scale kit for Digitrax signal: Dress up kit

If you have Digitrax signals, you need to try out this dress-up kit.

This kit comprises enough material to decorate three Digitrax signals.

<ul style="list-style-type: none"> • Etched brass • Can dress-up three signals • Designed by experienced modelist 	Specifications	
	Model Railroad Scale	N 1:160
	Amount of signals this kit decorates?	three digitax signals
	Experience level	Moderate
	Manufacturer	Scale Model Division (SMD Products)
	Full part number	SMD-N-120
Price	\$19.99 USD	

Infrared detector - tumble down signal controller APSIG-CONTROLLER & 2 APIRDETECTOR

The Infrared detector - tumble down signal controller APSIG-CONTROLLER & 2 APIRDETECTOR is designed to work in concert with other APSIG controller for tumble down operation. Up to 4 APIRDETECTOR can inserted per APSIG controller for more thorough detection

Is able to operate 2 signals with RED / YELLOW / GREEN LED such as [SMD-N-101](#) or 2 Bi-Color signals such as [SMD-N-108](#)

Interconnections are all color coded for easy plug and play setup. All connections are Telephone type RJ-11 connectors

Has the ability to detect white at a distance of up to 1 1/2 inch. For dark detection it is recommended to put white decal to help detection.

The infrared emitter does not emit any visible light. No soldering required. Protective heat shrink sleeve provides strain relief as well as circuit protection.

<ul style="list-style-type: none"> • Surface mount technology • Includes ALL wires for interconnection • No Soldering except for power supply connection on first unit - other units get their power from first unit • No visible light • Simple RJ 11 Connection • A must for SERIOUS modeling OK for low - moderate expertise • Infrared reflection technology • Reverse bias protection • Controls 2 signals • Signals with Bicolor LED Common Anode • Signals with two or three LED Common Anode • Made in Canada 	Specifications	
	Automated operation?	Tumble down operation
	Detector	operates with the included APIRDETECTOR
	Amount of signals	changes the aspect of 2 signals
	Soldering required	Power wires require soldering on first unit
	Stand alone operation?	YES - does not require any other computer
	Power supply Voltage	Requires 7VDC to 12VDC DO NOT use supply voltage above 15VDC
	LED current limit resistor?	Uses Toshiba Constant current technology and does not require any additional resistor
	Connection type for signal	Signal wires connect in RJ-11 Telephone cube and wires are connected with screw terminal
	Interconnection	All interconnections between detector boards, signals and detectors are made with reliable RJ-11 connectors
	Manufacturer	Designed and manufactured by Alain Pelletier P.Eng. Professional Engineer
	Modeling expertise required	Low - Moderate
International shipping?	Canada / US domestic postal shipping Airmail from Canada for international shipping	
Price	\$99.99 USD	

Details & Scenery

Brass - Castings - Loads - Scenery

N scale: white spruce trees

The white spruce tree is very common in the real train world. Here's a chance to get some for your modeling experience.

They are handcrafted by an advanced modeler with quality and detail experienced modeling enthusiasts demand

Specifications	
Modeling decade	Any
Model railroad scale	N or HO
Quantity in package	15
Manufacturer	(SMD Products)
Full part number	SMD-N-200
Price: \$24.99 USD	

Etched brass N-Scale kit Scaffolding and ladder kit

Your N-Scale layout must have some house renovations or construction. Any good N-Scale contractor requires ladders and scaffolding. This kit comprises 2 scaffolds and 4 ladders as well as 4 N-Scale 2x8.

Specifications	
Model Railroad Scale	N
Scaffold amount?	two scaffolding
Ladder amount?	Four Ladders included
Scaffold planks?	Four scale 2x8 included
Experience level	Moderate
Manufacturer	(SMD Products)
Full part number	SMD-N-401
Price	\$13.99 USD

Etched brass Z / N-Scale: MOUNTAIN BIKE

Now you can add modern mountain bikes on your layout! Available in N or Z

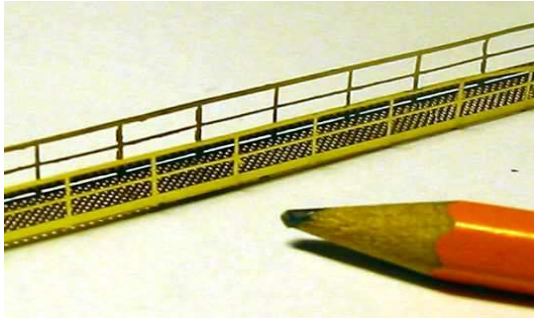

It will look great for modern modeling era.

Specifications	
Scale	N or Z
Painted?	No
Inspired from Real Mountain Bike?	Yes
Manufacturer	Alain Pelletier
Full part number	APEB-N-160 APEB-Z-160
Price	\$1.99 USD

Etched brass Z / N-Scale Catwalk

Z or N scale industrial scenery needs servicing access. Now you can buy the walkway by the linear inch - scaled 13 feet It will look great for modern modeling era.

Specifications	
Scale	N or Z
Painted?	No
Inspired from Real walkway?	Yes
Catwalk width	36 inches
Railing width	48 inches
Manufacturer	Alain Pelletier
Full part number	APEB-Z 120 APEB-N-120
Price / inch	\$3.33 USD

Etched brass Z or N-Scale: Access Ladder safety Cage

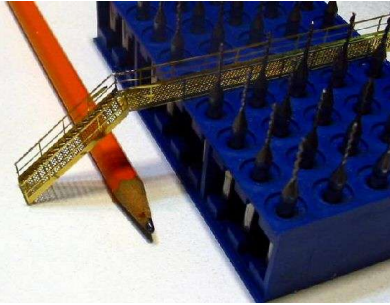

Z or Nscale factories need access and service ladders. Osha requires access ladders over 20 feet to have a safety cage at 30 feet, a platform is required. As a Z-Scale Plant manager, you are required by law to ensure the safety of your crew. It will look great for modern modeling era.

Specifications	
Scale	Z or N
Painted?	No
Assembled?	Cage is formed Precision solders made with atmosphere
Ladder Z-Scale width	24 inch
Step Z-scale height	12 inch
Cage section Z-Scale height	4 feet
Total height	24 feet
Ladder height	24 feet
Inspired from Real access ladder?	Yes
Manufacturer	Alain Pelletier
Full part number	APEB-Z-100 APEB-N-100
Price	\$3.99 USD

Etched brass Z or N-Scale: Catwalk STAIRS

N scale industrial scenery needs servicing access. Now you can buy the walkway stairs by the 4 unit steps. It will look great for modern modeling era.

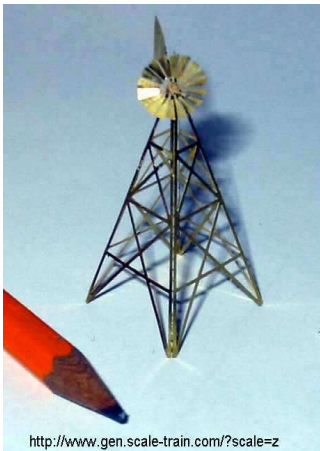

Specifications

Scale	Z or N
Painted?	No
Inspired from Real walkway?	Yes
Stair width	36 inches
Railing height	48 inches
Manufacturer	Alain Pelletier
Full part number	APEB-Z-130 APEB-N-130
Price / 4 steps	\$3.33 USD

Etched brass Z / N-Scale: Farm Windmill

Z scale farms still have pump windmills today. Those windmills would extract groundwater and irrigate fields or bring the water to large tank.

It will look great for any modeling era.

Z scale shown

Specifications

Scale	N or Z
Painted?	No
Assembled?	Yes Fully assembled
Moving parts?	No
Inspired from Real windmill?	Yes
Windmill height	20 feet
Base width	6 feet
Manufacturer	Alain Pelletier
Full part number	APEB-Z-FARMWINDMILL APEB-N-FARMWINDMILL
Price	\$29.99 USD

Laser cut Z N-HO-Scale Picnic table

The picnic tables are fully assembled. Picnic tables can be seen anywhere in model train worlds. Break area for your crews, Picnic sites, rest area It will look great regardless of the modeling era. It is laser cut using birch plywood for great results and detail.

Specifications

Picnic Tables	Z N HO
Inspired from Real tables?	Yes
Package quantity	5
Assembled?	Yes, not painted
Manufacturer	Scale Model Division (SMD Products)
Full part number	SMD-Z-405 SMD-N-405 SMD-HO-405
Production amount	Not limited
Price	\$11.99 USD

Etched brass Z or N-Scale: Access Ladder

This is a general purpose Z-Scale ladder for scratchbuilding and detail use
It will look great for modern modeling era.

Shown in Z

Specifications

Scale	Z or N
Painted?	No
Assembled?	No assembly required
Ladder Scale width	24 inch
Step Scale height	12 inch
Total Scale height	60 feet
Inspired from Real access ladder?	Yes
Manufacturer	Alain Pelletier
Full part number	APEB-Z-110 APEB-N-110
Price	\$3.50 USD

TruFX & Lighting

TruFX vehicules: N-Scale Police Cruiser with red - blue LED SLAP-N-911

The SLAP-N-911 is the next addition to your collection

It provides realistic animation when combined with an included TruFX-504A flasher/sequencer to get that WWOW! reaction from your visitors.

A red and blue 0603 LED are mounted on the car and connected with three wires.

Accident scenes can be built to spice up your modeling experience.

<ul style="list-style-type: none"> • Pre-wired LEDs red and blue • Elegant Police cruiser 911 decals • Conceiled wires • A must for SERIOUS modeling • Combine with other vehicules to create scenes • Hand made by an advanced modeler • Quality made in Canada • Included TruFX-504A sequencer 	Specifications	
	Modeling decade	1990s
	Police Cruiser decals?	Yes
	RED LED	Yes 1
	Blue LED	Yes 1
	LED flasher/sequencer included?	Yes: TruFX-504A sequencer
	Manufacturer	SLAP
	Full part number	SLAP-N-911
	Price	\$55.99 USD

TruFX vehicles:N-Scale Tow Truck - yellow LEDs SLAP-N-912

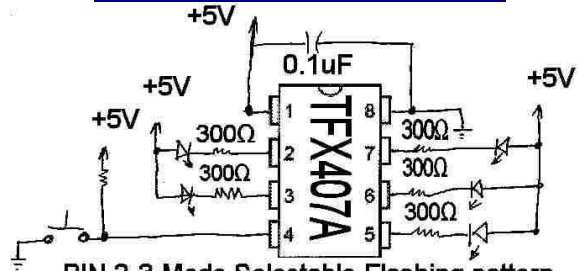

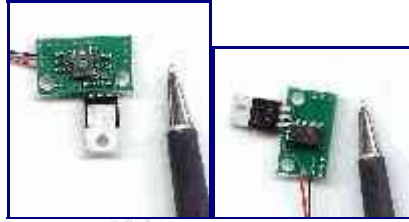

The SLAP-N-912 is the next addition to your collection

It provides realistic animation when combined with an included TFX504A flasher/sequencer to get that WOW! reaction from your visitors.

Two prewired yellow 0603 LED are mounted on the tow truck.

Scenes can be built to spice up your modeling experience. - [Include a police cruiser](#) for great looking accident scenes!

<ul style="list-style-type: none"> • Pre-wired LEDs Yellow • Concealed wires • No Soldering required • TFX504A Sequencer included • A must for SERIOUS modeling • Combine with other vehicles to create scenes such as police cruiser • Hand made by an advanced modeler • Quality made in Canada 	Specifications	
	Modeling decade	1990s
	Tow truck decals?	NO
	Yellow LED	Yes 2
	LED flasher/sequencer included?	YES: TFX504A included
	Manufacturer	SLAP
	Full part number	SLAP-N-912
Price	\$79.99 USD	

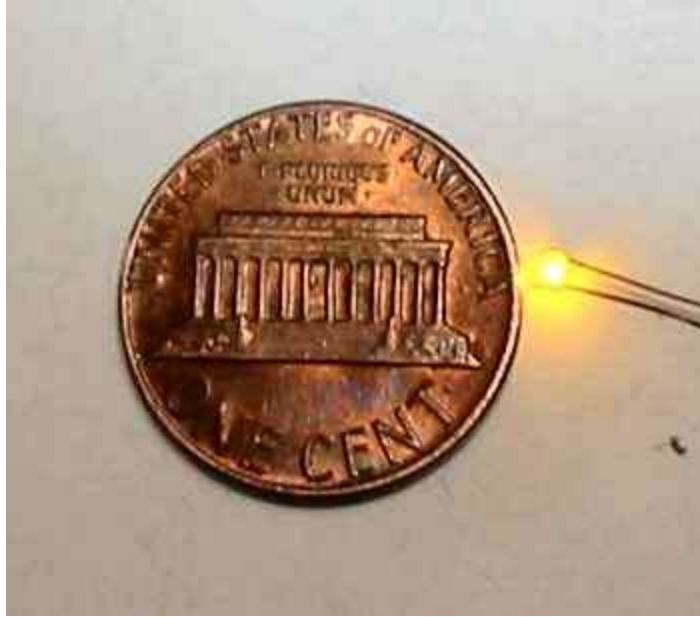

PIN 2-3 Mode Selectable Flashing pattern
 PIN 5-6-7 50% flasher simulating car blinker
 Slightly out of phase for effect
 PIN 4 Mode Selection
 PIN 1 +5V
 PIN 8 Ground

TruFX Flasher Circuit TruFX-504A

The TruFx LED flasher brings you scene to life. There are 11 distinct flash rates for different flavors of lighting effect.

You can select your favorite flashing pattern by a simple press of a button. The settings are maintained even after power down.

<ul style="list-style-type: none"> • Police 1 • Police 2 • EMT 1 • EMT 2 • Alternating 1 • Alternating 2 • Utility 1 • Utility 2 • Lighthouse beacon • Fire simulation • Welding simulation • Strobbing effect • Quality made in Canada 	Specifications	
	Flash patterns	11 flash patterns available
	LED included?	NO
	Supply voltage	6.5VDC to 15VDC
	Setting retention?	Settings are written to non volatile EEPROM for setting retention even in the absence of power
	Manufacturer	Alain Pelletier
	Full part number	TruFX-504A
Price	\$20.99 USD	

0603 LED Red Yellow Green Blue or White

The 0603 LED will look great on your model train accessories such as Emergency vehicles - tower beacons

It provides realistic light in a tiny 0603 package

<ul style="list-style-type: none"> • 0603 • Resistor included • Pre wired for easy installation • A must for SERIOUS modeling • Hand made by an advanced modelist • Quality made in Canada 	Specifications	
	LED color	Choice of Yellow, Red, Blue, Green and White
	LED size	0603
	Wires attached	Yes
	Quantity in package	One
	Manufacturer	Alain Pelletier
	Modeling expertise required	Low - Moderate some soldering experience required
	Resistor included	511 ohm SMT resistor included for 12V operation
Price	\$3.99 USD Please specify color	

White 3mm LED for model railroad - light for train engines White 3mm LED

The White 3mm LED for model railroad - light for train engines White 3mm LED will look great on your model train engine

It provides realistic white light in a small 3mm package

<ul style="list-style-type: none"> • 3mm • Easy to follow instructions • A must for SERIOUS modeling 	Specifications	
	LED color	White
	LED size	T1 - 3mm
	Leads	Yes
	Quantity in package	One
	Modeling expertise required	Low - Moderate Some soldering required
	International shipping?	Canada / US domestic postal shipping Airmail from Canada for international shipping
	Price	\$1.25 USD
